'Exit China' mantra grows

1,000 foreign firms mull production in India, 300 actively pursue plan : Mr. Pradeep Andhare Sir shared a link informing that 1,000 foreign firms mull production in India, 300 actively pursue plan as 'Exit China' mantra grows. Mr. Chincholkar instantly replied that This is positive news. Are our really geared up for this?? Mr. Jeevan Talegaonkar answered by saying that it's a Good question... we suck in our infra quality, all road, transport, electricity, water, capital processing, tax regime, we have insurmountable amount of corruption in execution, we have very very slow process centred bureaucracy, we need to move with super fast speed to attract investments...other neighbouring countries like Thailand and more so Vietnam is best placed to attract manufacturing settlements.

The beginning : Reliance Jio and Facebook, signed a 43,574 crore deal

This the small beginning of emergence of New India in Global economic and political domain. Last night's interview of Steve Bannon by Rahul Shivshankar of Times TV was worth watching. It clearly came up in discussion that India will be approached by FDI by Big players very soon, even before Corona and China lose war with the humanity. It's good beginning, of course lot of strategic moves and patience would be required to grab this global opportunity as said by Mr. Ramesh Sangare

Good future for young entrepreneurs

India essentially had been the nation of entrepreneurs the trait which was systematically demolished by Lord Mckhalee during British Raj bringing in Babu culture. However deeply embedded culture is and will be back substantially and significantly in the near future in the form of MSEMEs and Startups needed for helping large corporations and Govt. Sectors. We will rebound positively. Huge domestic market plus more productive Global dependence on us would create innumerable opportunities for young Indians in coming times. Wait and watch New India is emerging.
